DEC10 WEEK 3 · DAY 5 · 23A DISCUSSION SKILLS (1) · SKILL 1

Human sentence — *Statement A cards*

1. Take one **A** card and one **B** card. Read them **aloud**.
2. The third person **chooses a device** card and stands **between** them.
3. Read the whole sentence. **Explain why** the device fits. Thumbs up or down?

A STATEMENT A — A1

The transition to a green economy is like an industrial revolution due to its impacts.

A STATEMENT A — A2

A green economy aims to improve well-being and equity while reducing environmental risks.

A STATEMENT A — A3

Defining "green jobs" lacks universal criteria, which complicates policy decisions.

A STATEMENT A — A4

Green and non-green jobs often share similar skills, affecting retraining needs.

A STATEMENT A — A5

Green jobs are generally higher-skilled and less routine than non-green jobs.

A STATEMENT A — A6

The concepts of "green jobs" and "green skills" are often vague and used interchangeably.

A STATEMENT A — A7

Green jobs can either be traditional roles adapted to green goals or entirely new roles.

A STATEMENT A — A8

Green jobs are becoming more skill-intensive, requiring specific technical skills.

Set: A1–A8 · B1–B7 · 16 devices · cut on the dashed lines

Human sentence — *Statement B cards*

Statement A + cohesive device + Statement B → say why

B STATEMENT B — B1

Soft skills like creativity and resilience are more important in the green economy.

B STATEMENT B — B2

Green skills directly combat climate change by preserving natural resources.

B STATEMENT B — B3

The demand for green skills has grown steadily, increasing by 9% annually.

B STATEMENT B — B4

Only one in eight workers currently has green skills, creating a significant skills gap.

B STATEMENT B — B5

Workers with green skills are 30% more likely to be hired than those without.

B STATEMENT B — B6

Demand for green skills varies between countries and between sectors.

B STATEMENT B — B7

Science, technology, and engineering workers adopt green skills faster than others.

? EXPLAIN YOUR CHOICE — HOW

I chose "On the other hand" **to make a contrast between** …

"As a result" **shows that the second idea is an effect of** the first.

These two don't really connect, because … → take new cards.

Human sentence — *cohesive device cards*

Hold the device card **between** Statement A and Statement B. One device per sentence. **Example:** Green jobs are generally higher-skilled and less routine than non-green jobs. **On the other hand,** green and non-green jobs often share similar skills.

+ **Moreover** ADDITION	+ **In addition** ADDITION	+ **Furthermore** ADDITION	+ **Also** ADDITION
↔ **However** CONTRAST / CONCESSION	↔ **On the other hand** CONTRAST / CONCESSION	↔ **In contrast** CONTRAST / CONCESSION	↔ **Although** CONTRAST / CONCESSION
→ **Therefore** CAUSE AND EFFECT	→ **As a result** CAUSE AND EFFECT	→ **Consequently** CAUSE AND EFFECT	→ **This leads to** CAUSE AND EFFECT
e.g. **For instance** EXAMPLE	e.g. **For example** EXAMPLE	e.g. **Such as** EXAMPLE	e.g. **To illustrate** EXAMPLE
