DEC10 WEEK 3 · DAY 1 · 1A BUILDING RAPPORT

Find someone who … *the future of work*

My name _____

1. **Stand up** and walk. Ask a classmate the question in one square.
2. They say **yes**? Write their **name** — then ask **one follow-up** question.
3. One classmate = **one square**. Four in a row = **BINGO!** Shout it out.

PHRASE OF THE DAY *"That's interesting — could you tell me a bit more about …?"*

01 FIND SOMEONE WHO

wants a job that helps the environment

"Do you want a job that helps the environment?"

NAME _____

FOLLOW-UP _____

02 FIND SOMEONE WHO

has had a part-time job

"Have you ever had a part-time job?"

NAME _____

FOLLOW-UP _____

03 FIND SOMEONE WHO

knows someone who works in energy

"Do you know anyone who works in energy?"

NAME _____

FOLLOW-UP _____

04 FIND SOMEONE WHO

recycles every day

"Do you recycle every day?"

NAME _____

FOLLOW-UP _____

05 FIND SOMEONE WHO

wants to work in another country

"Would you like to work in another country?"

NAME _____

FOLLOW-UP _____

06 FIND SOMEONE WHO

has a solar panel at home (or at a relative's home)

"Is there a solar panel on your home?"

NAME _____

FOLLOW-UP _____

07 FIND SOMEONE WHO

can name three green jobs

"Can you name three green jobs?"

NAME _____

JOBS _____

08 FIND SOMEONE WHO

wants to start their own business

"Would you like to start your own business?"

NAME _____

FOLLOW-UP _____

09 FIND SOMEONE WHO

has changed their mind about their future career

"Have you ever changed your mind about your career?"

NAME _____

FOLLOW-UP _____

10 FIND SOMEONE WHO

rides a bike or walks to class

"Do you walk or ride a bike to class?"

NAME _____

FOLLOW-UP _____

11 FIND SOMEONE WHO

thinks AI will change their future job

"Do you think AI will change your future job?"

NAME _____

FOLLOW-UP _____

12 FIND SOMEONE WHO

has done volunteer work

"Have you ever done volunteer work?"

NAME _____

FOLLOW-UP _____

13 FIND SOMEONE WHO

would like to work from home

"Would you like to work from home?"

NAME _____

FOLLOW-UP _____

14 FIND SOMEONE WHO

has taken an online course

"Have you ever taken an online course?"

NAME _____

FOLLOW-UP _____

15 FIND SOMEONE WHO

knows what an electric-car mechanic does

"Do you know what an electric-car mechanic does?"

NAME _____

FOLLOW-UP _____

16 FIND SOMEONE WHO

wants to study engineering or science

"Do you want to study engineering or science?"

NAME _____

FOLLOW-UP _____

BINGO! 4 in a row — across, down or diagonal

Squares I filled: ☐ ☐ / 16

Turn over for useful phrases →

Keep the chat going — *useful phrases*

Hold this side up while you walk. Try to use one phrase from every box.

Ask

- Excuse me — can I ask you a quick question?
- **Have you ever** …?
- **Would you like to** …?

Follow up

- Oh really? **What was that like?**
- **How come?**
- **Tell me more** about that.
- **What made you** decide …?

Show interest

- That's interesting!
- No way! Me too.
- I've never thought about that.

Move on politely

- **Nice talking to you** — I'd better find someone for the next square!
- Thanks! See you later.

Follow-up questions — one for each kind of square

HAVE YOU EVER …?
When was that? · Where was it? · Would you do it again?

DO YOU …?
How often? · Why do you do that? · Is it easy or hard?

WOULD YOU LIKE TO …?
Why? · Where / which one? · What would you need to learn?

DO YOU THINK / KNOW …?
Why do you think so? · Can you give me an example?

After the game · tell the class

Report one thing you learned. Use the past tense and a name.

I found out that _____

The most surprising answer was _____

Keep standing — move to a new person every time.

Answer in a full sentence: "Yes, I have. Last year I …"

Only one name per classmate. Be honest!

DEC10 WEEK 3 · DAY 1 · 3A GROUP WORK SKILLS

Group role cards *everyone has a job*

Group _____

Each person takes one card and puts it on the table in front of them. After every activity, pass your card to the person on your left. Group of 5? Two people share the language monitor job.

Cut along the dashed lines · 4 role cards per group

ROLE 1

Chair

You invite everyone to speak and keep everyone talking. Make sure every person reads or says something.

SAY

- "What do you think, Omar?
- "We haven't heard from … yet.
- "Does anyone have a different view?

NAME _____

ROLE 2

Timekeeper

You watch the clock. Tell the group how much time is left, and help them finish on time.

SAY

- "Two minutes left.
- "Five minutes left — let's get ready to share.

NAME _____

ROLE 3

Language monitor

You listen and tick the useful phrases people use (in the card game: O, F, N and R). Tell the group at the end.

SAY

- "You used 4 phrases!
- "O? F? N? R? — you used all four!

TICKS

ROLE 4

Reporter

You tell the class the result of your group — short and clear. Take notes so you are ready.

SAY

- "Our group found that …
- "Our move is … because …

NAME _____

DEC10 WEEK 3 · DAY 1 · 3A GROUP WORK SKILLS

The OFNR card game *build it together*

Group _____

1. Groups of 4–5 in a circle. Deal 4–5 cards each. Keep them secret.
2. One student reads an O card aloud and puts it on the table.
3. Others offer the best F, then N, then R card. Discuss: which fits best?
4. Set complete? Read it aloud calmly. Next student starts a new set.

✂ Cut along the dashed lines · 20 cards per set (5 O · 5 F · 5 N · 5 R) · write the set letter in the box

O OBSERVATION SET ☐ In our group, I have noticed that the same people tend to do most of the tasks.	F FEELING SET ☐ I feel frustrated
O OBSERVATION SET ☐ When I see that the deadlines for the project tasks were missed by a couple of days last week	F FEELING SET ☐ I feel disappointed
O OBSERVATION SET ☐ I noticed that during our last group meeting, some voices were louder than others and not everyone was able to share their ideas.	F FEELING SET ☐ I feel upset
O OBSERVATION SET ☐ When I see our group discussions drift off-topic and go overtime	F FEELING SET ☐ I feel anxious
O OBSERVATION SET ☐ When I see you looking at your phone while I am talking	F FEELING SET ☐ I feel concerned

Need and request cards — *cut out*

✂ 5 N · 5 R

N NEED — SET	R REQUEST — SET
I value fairness and inclusion	Would you be willing to discuss how we might better manage our time together?
I need connection and acknowledgement	Would you be willing to have a designated "time-keeper" who ensures that our discussions remain on track?
I believe that everyone's input is important for our project's success	Would you be willing to put your phone away for the next 10 minutes and hear what I have to say?
I need more efficiency in meetings so that we can cover everything without taking extra time.	Could we review our tasks and make sure we have a balanced workload?
I need reassurance that we can get things done on time to avoid last-minute stress	Would you be willing to discuss what we can do to ensure everyone gets a chance to speak?

Read your set aloud — calm and friendly

- **O** When I see … / I have noticed that …
- **F** I feel …
- **N** because I need … / I value …
- **R** Would you be willing to …?

Language monitor · tick for each speaker

Name	O	F	N	R
	○	○	○	○
	○	○	○	○
	○	○	○	○
	○	○	○	○

Tip: the aim is not to guess the feeling of another person — it is to get comfortable with the language of NVC.

PARAGRAPH

A

A. The green growth transition (“greening”) has been called a modern-day industrial revolution due to its expected large structural impact on labour markets worldwide (Bowen et al., 2016). According to the United Nations Environment Programme (2008), a “green economy” is one that results in improved human well-being and social equity, while significantly reducing environmental risks. Policy-makers have two main goals for the green economy: managing the transition to green jobs and promoting green economic growth (Martinez-Fernandez et al., 2010). The impact on employment is one important way for policy-makers to assess the effects of environmental policies pursuing these goals. However, the definition of a “green job” is not universal.

B

PARAGRAPH

B

B. For instance, a secretary could be called a green worker in a renewable energy company but not in a fossil fuel company, even if the work is the same. Since the definition of green jobs influences policy decisions, standardised criteria to classify jobs as “green” need to be adopted. This involves recognizing what makes green jobs different from other jobs. Are there skills specific to green jobs, or does the label “green” merely reflect the type of job to which the same skills are applied? The similarity of skills used in green and non-green jobs can also help determine the content of re-training programmes. If the skill sets required for green jobs are largely different from their non-green counterparts, then non-green workers may need extensive off-the-job training to supplement on-the-job training, in order to enable the transition to the green economy.

PROOF WORDS Underline them · read them aloud to the class

PARAGRAPH

C

C. Although the literature on green jobs is expanding, the research on skill needs for green growth is still patchy. Fankhauser et al. (2008) note that there is relatively little information on the productivity, pay and other attributes of jobs created and destroyed by climate-change policies. Cedefop (2010) complains that “We have not paid enough attention to the social dimension of sustainable development: its implications for employment, training and skills.” Even in countries with relatively good labour market data, it is difficult to identify which job skills are most likely to be affected by green growth policies. For example, Hatfield-Dodds et al. (2008) note that in Australia “current information on green skills and workforce capabilities is very poor.”

PARAGRAPH

D

D. Recently, studies have used the O*NET database to learn more about green jobs. This database, created by the US Department of Labor, includes detailed information on job tasks and skills, and identifies specific green tasks. Researchers Vona et al. (2017) are using O*NET's task information to construct a measure of “greenness” and identify general categories of green skills. They have found that green occupations are less routine-intensive and higher-skill than non-green occupations and require high-level analytical and technical skills related to technology. Similarly, it has been pointed out that that green jobs involve more high-level abstract skills, and require more education, work experience, and on-the-job training (Consoli et al., 2015).

PARAGRAPH

E

E. These researchers are also constructing a measure of “skill distance,” which indicates the extent of re-training required to transition from one job to another (Vona et al., 2017). For example, the skill distance (and hence required re-training) would be smaller between a marketing manager and a sales manager than between a marketing manager and a software developer. Vona et al. (2017) have found considerable variation both within and among major occupational groups. As they outline, there is some evidence that engineers, scientists, and operation managers have the smallest skill distance across jobs, whereas the largest skill differences are concentrated in a few low- and medium-skill occupations.

PARAGRAPH

F

F. Our findings support this research and provide additional insights for policymakers on green jobs and how to transition to them. Using O*NET's broad definition of green jobs, 19.4% of the US workforce could currently be considered to be part of the green economy, although a large proportion of green employment would be “indirectly” green. Additionally, green jobs vary in “greenness” (the use and importance of green tasks), with very few jobs consisting solely of green tasks. This variability suggests that the term “green” should be considered as a continuum rather than a binary characteristic. Furthermore, greening is likely to involve transitions on a scale and scope similar to existing job transitions. While it is easier to transition to indirectly green rather than directly green jobs, non-green jobs generally appear to differ from their green counterparts in only a few skill-specific aspects, indicating that most re-training can occur on-the-job. Consequently, the green economy has significant potential for short-run growth, provided that job transitions are strategically managed.

DEC10 WEEK 3 · DAY 1 · 2A READING TO SPEAK

Quiz – quiz – trade *nine green-job terms*

1. **Stand up.** Take one card. Read the definition. Hide the card.
2. Find a partner. Say the definition **in your own words.** Partner guesses the term. Swap.
3. **Trade cards** and find a new partner. Three partners, then sit and do the matching.

SAY IT *"My term means …"* · *Is it …?* · *Yes, that's it! / Not quite — try again.*

✂ Cut along the dashed lines · 9 cards

TERM CARD T1

Green economy

Economic activity related to reducing fossil fuel usage, decreasing pollution and greenhouse gas emissions, recycling materials, increasing energy efficiency, and developing/adopting renewable energy sources.

Say: *"It's all the economic activity that …"*

TERM CARD T2

Greening

The effect of the green economy on occupations, which includes increased demand, changes in worker requirements, and the creation of new occupations/worker requirements.

Say: *"It's what happens to jobs when …"*

TERM CARD T3

Green Increased Demand (ID)

Existing jobs that are expected to be in high demand due to 'greening', without requiring significant changes in tasks, skills, or knowledge (hence considered 'indirectly green').

Say: *"The job stays the same, but …"*

TERM CARD T4

Green Enhanced Skills (ES)

Existing jobs that require significant changes in tasks, skills, and knowledge due to 'greening'.

Say: *"The job exists, but it changes …"*

TERM CARD T5

Green New & Emerging (NE)

New jobs with unique worker requirements that meet the specific needs of the green economy.

Say: *"It's a brand-new job that …"*

TERM CARD T6

Career changer

Jobs with similar skills and experience as the initial job, requiring minimal additional preparation to transfer from the initial job.

Say: *"You can move to it easily …"*

TERM CARD T7

Career starter

Jobs that appeal to individuals with similar general abilities and preferences over job characteristics/work environment, which may require more extensive preparation to transfer from the initial job.

Say: *"It suits people who …"*

TERM CARD T8

Linked jobs

Two jobs, one of which is either a career changer or career starter for the other. Hyphens signify 'to' i.e. Green Rival-Green is short for 'Green Rival to Green'

Say: *"It's two jobs that are connected …"*

TERM CARD T9

Green Rival job/occupation

Non-green jobs with at least one Green career changer or career starter.

Say: *"It isn't green now, but …"*
